EDUCATION

San Diego Global Knowledge University

2022-2023

Fullstack Development

ITT

2019-2024

Systems Engineering & Software Development

AWARDS & CERTIFICATIONS

- Google Web Dev I
- Solo learn C++

SKILLS

Web

React, NextJS, MongoDB, ThreeJS, Django

Mobile

Expo, React Native

Desktop

C#, Java, Python

PROFILE

Hi, I'm Arturo Martinez — a passionate Software Engineer and Full-Stack Developer.

As a junior developer, I bring fresh energy and a strong foundation in both front-end and back-end technologies. I thrive on solving problems, learning new tools, and turning ideas into real-world solutions.

With experience in JavaScript, Python, and Java, I build responsive applications using modern frameworks like React, Node.js, and Django. I'm always exploring new trends, continuously sharpening my skills to grow with the fast-paced tech industry.

WORK EXPERIENCE

PARK IT *Developer*

2019 - 2020

- Developed a form-based web application for internal management processes.
- Built a mobile app focused on psychological assistance, helping users access mental health resources more easily.
- Designed and implemented backend RESTful endpoints using Django.

ITJ - Dexcom *QA Tester*

2023-2024

- Performed mobile and web testing for insulin logging and tracking apps used by patients managing diabetes.
- Carried out manual and automated testing on insulin sensor integrations.
- Maintained detailed documentation on testing procedures, bug reports, and quality standards.

ITT *Developer*

2024-2025

- Contributed to the development of AI models for early detection of Parkinson's and Alzheimer's diseases.
- Implemented an intuitive web interface for both doctors and patients to interact with prediction data.
- Designed distinct user views to ensure a seamless and secure experience for each user role.
